1. Claims 1-30 remain for examination.
2. The abstract of the disclosure is objected to because the current abstract does not reflect the inventive feature of the claimed invention to distinguish over the prior art. Correction is required. See MPEP § 608.01(b).

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claim 1, it is not clear what is the use of the shift carry operand stored in the register.

(b) Claim 1, it is not clear what is the use of the mask bits. The phrase, "each of the mask bits defining a bit position of the shifted operand to be operated on" is ambiguous.

(c) Claims 11 and 21, the same as (a) and (b).

5. Applicant's arguments filed October 22, 2004 have been fully considered but they are not persuasive.

Applicant argued that Groves does not teach a field mask having one bit for each bit of the shifted operand, allowing shift by any number of bits.

The corresponding recited limitations in the claims are ambiguous and do not reflect what applicant presented in his argument.

Art Unit: 2111

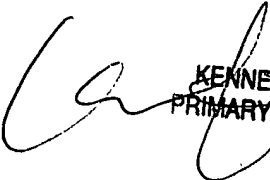

6. Claims 6-10, 16-20, and 26-30 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
